

DLA Piper assisted Curasight with global license of uTRACE® for use in prostate cancer

Ulrik Bangsbo Hansen
Partner

Danish Curasight A/S has entered into an exclusive global license and collaboration agreement with Curium Inc. for the development and commercialization of uTRACE® for use in prostate cancer.

Curasight will develop its proprietary uTRACE® technology for use in prostate cancer until regulatory approval is granted in the EU and USA. Curium will have responsibility for the commercial manufacture of uTRACE® and world-wide commercialization.

Curasight is eligible to receive up to USD 70 mn in development and commercial milestones as well as double-digit percentage royalties on sales in major markets upon eventual commercialization.

In the company's press release, CEO in Curasight, Ulrich Krasilnikoff, says: "This partnership supports further development of our diagnostic platform, bringing us closer to fulfilling our ambition of helping a large number of prostate cancer patients."
