What is blockchain?

How does Cosmos fit in the broader blockchain ecosystem

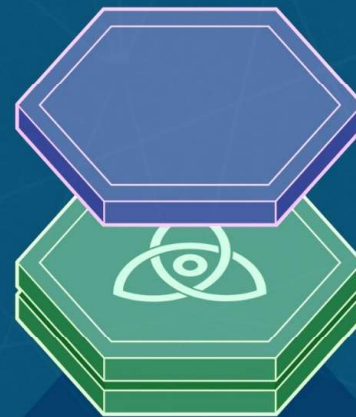

The Bitcoin story (blockchain 1.0)

The Ethereum story (blockchain 2.0)

The vision of Cosmos (blockchain 3.0)

The Next Generation of Money

e-Money is the first issuer of interest-bearing, currency-backed tokens on blockchain

Fully Backed

Global Currencies

Interest Bearing

Transparent

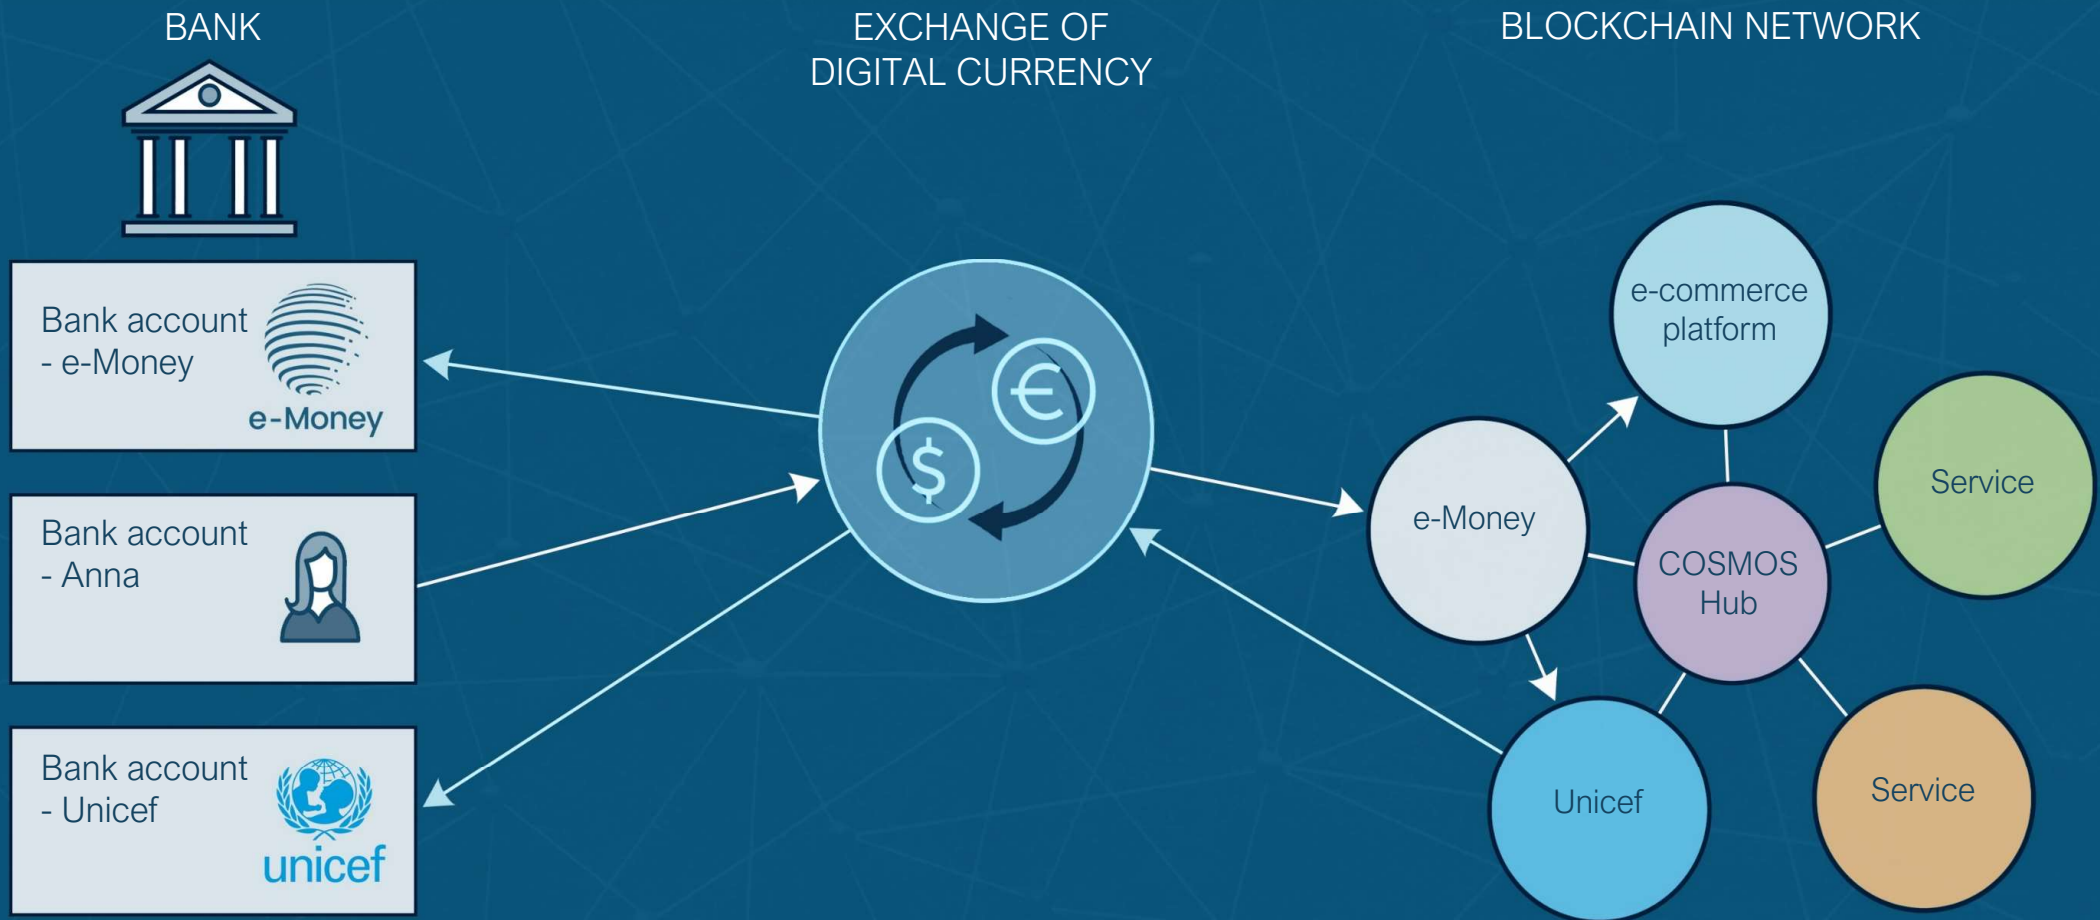

Compliant

Protected

The e-Money solution

e-Money use cases

International companies

E-commerce

"Global average transaction costs of remittances, are more than twice as high as the UN-proposed target cost"

"One in four millennials carries less than \$5 cash on them"

Payments & Remittances

NGO's & Charities

Blockchain projects – Cosmos ecosystem
